Home Base Charging Station

Getting started

1 Get ready

To start, you'll need your robot, charging station, the drip tray and power cable.

2 Position the charging station and plug in

Choose an area near an outlet with good Wi-Fi coverage.

Plug the power cable into the charging station, and then into the wall.

WARNING: To prevent the risk of your robot falling down stairs, ensure that the charging station is placed at least 4 feet (1.2 metres) away from stairs.

3 Attach the drip tray

Place the drip tray onto the front of the charging station.

4 Wake up your robot

Slide your robot onto the charging station contacts to activate the battery. The light ring will light up after a few minutes and a sound will let you know it's awake.

5 Connect and update

Connect your robot to the iRobot HOME App to allow remote control, cleaning customisation and to keep your robot's software up to date.

6 Attach a cleaning pad

Slide a wet mopping or dry sweeping pad onto the underside of the robot.

Detach an existing cleaning pad by pressing the button on the front of the robot.

Cleaning pad types

 Wet Mopping Pads

Single-Use Wet Mopping Pad

Washable Wet Mopping Pad (Microfibre)

 Dry Sweeping Pads

Single-Use Dry Sweeping Pad

Washable Dry Sweeping Pad (Microfibre)

7 Fill the tank

Remove the tank from the robot.

Add Braava jet® Hard Floor Cleaning Solution (if using).

Then fill to the top with water.

Cleaning Solution

When wet mopping, you may add Braava jet® Hard Floor Cleaning Solution to the tank before adding water. This product is a concentrate that is suitable for all well-sealed hard floors.

 **Important:** Braava jet® Hard Floor Cleaning Solution is the only solution that can be safely used in your robot mop. Please do not use other cleaning solutions.

Sample size (Included in box)

1/2 bottle per tank

Retail: Full size (Sold separately)

6 capfuls per tank

Using Your Braava jet® m6 Robot Mop

Cleaning

Use your robot frequently to maintain well-conditioned floors.

Just Press CLEAN

Tap to Start/Pause/Resume

Hold for 3 seconds to end a job and put the robot to sleep

Hold for 10 seconds to reboot

- Your robot will automatically explore and clean your home, moving in a methodical manner across the floor, with some overlap from one pass to the next to ensure that every spot on the floor is cleaned three times. If you are looking for a quicker clean or a deeper clean than this default setting, or if you want to adjust the amount of water sprayed, you can change your cleaning preferences from the iRobot HOME App.
 - Your robot will return to the charging station at the end of a cleaning job, whenever it needs to recharge or when the tank needs to be refilled.
-  **Note:** Note: If the 'CLEAN' text is pulsing while charging, your robot is in the middle of a cleaning job and will automatically resume where it left off once recharged.
- To send the robot back to its charging station, tap  (home). A blue light ring pattern will indicate that the robot is seeking the charging station. This feature will only work if your robot started the job from the charging station.
 - When the robot senses that its tank needs to be filled, the light ring indicator will illuminate in a red sweeping motion towards the lid latch.

- Clean smaller designated areas (3.3 ft²/1 m²) by placing your robot at the bottom centre of the space you'd like to focus on. Tap  (spot clean) to start cleaning.

Tips for Optimising Performance

- Your robot works best when used with the iRobot HOME App.
- For optimal mopping performance, we recommend that you vacuum first to pick up large dirt and debris before running Braava jet®.
- Your robot will only run with Braava jet® m Series pads, which are made specifically for Braava jet® m Series robots.
- Use a new pad for each cleaning job, and do not pre-wet the pads prior to use.
- Keep your charging station plugged in and the area around it clear of clutter.
- You can use a Dual Mode Virtual Wall® Barrier to help keep your robot in places that you want to be cleaned, and out of the ones you don't. (Sold separately)
- Within the iRobot HOME App, you can adjust cleaning preferences to modify cleaning power, speed and coverage.

Charging

- Slide your robot onto the charging station contacts to activate the battery.

 **Note:** Your robot comes with a partial charge, but we recommend that you charge the robot for 3 hours prior to starting the first cleaning job.

- The light ring indicator will show the current charging status. This will turn off after 1 minute to save power, but can be shown again if you press CLEAN. This can also be seen in the iRobot HOME App.

Light Ring While Charging

Solid: fully charged

Pulsing: charging

- Your robot uses a small amount of power whenever it is on the charging station. You can put the robot in a further-reduced power state when not in use. For instructions and more details on this Reduced Power Standby Mode, refer to the iRobot HOME App.
- For long-term storage, turn off your robot by removing it from the charging station and holding down  (home) for 10 seconds. Store your robot in a cool, dry place.

Lithium Ion Battery

For the best results, only use the iRobot Lithium Ion Battery that comes with your Braava jet® m6.

 **WARNING:** Lithium ion batteries and products that contain lithium ion batteries are subject to stringent transportation regulations. If you need to send this product (with the battery included) for service, travel or any other reason, you MUST follow these delivery instructions.

- The battery MUST be turned off before shipping.
- Turn off the battery by removing the robot from the charging station and holding down  (home) for 10 seconds. All indicators will turn off.
- Package the product in its original packaging.
- Ship via ground transportation only (no air shipping).
- If you need further assistance, contact our Customer Care team.

Troubleshooting

- Your robot will tell you something is wrong by playing an audio alert and turning the light ring indicator red. Press CLEAN for details. Further support and instructional videos are available in the iRobot HOME App.
- After 90 minutes of inactivity off the charging station, your robot will automatically end its cleaning job.

Low battery. Please charge.

Care and Maintenance

Cleaning the Sensors and Pad Reader

Clean the sensors on the bottom of your robot with a damp cloth.

Important: Do not spray cleaning solution or water onto the sensors or sensor openings.

Cleaning the Wheels

Pull off any visible debris or hair that gathers around the wheels.

Cleaning the Body of the Robot

Wipe clean with a damp cloth.

Cleaning the Tank

If you notice an odour from the tank

- 1 Remove the tank from your robot mop.
- 2 Fill the tank with warm water. Do not use boiling water.
- 3 Close the cap and lightly shake the tank.

- 4 Rinse the tank and repeat as necessary.

Cleaning the Drip Tray

- 1 Remove the robot from the charging station.
- 2 Separate the drip tray by lifting it up from the charging station.

- 3 Clean the drip tray with a damp cloth or with warm water in the sink.
- 4 Dry thoroughly before reattaching the drip tray to the charging station.
- 5 Put your robot mop back onto the charging station.

Caring for Washable Cleaning Pads

Note: You can clean your washable pads in two ways: either by hand washing or in a washing machine.

Hand Washing

Thoroughly wash the pad with warm water.

Machine Washing

Wash using the warm cycle, then air dry. Do not put in the dryer. Do not wash with delicates.

iRobot Customer Care

USA & Canada

If you have questions or comments about your Braava jet® robot mop, please contact iRobot before contacting a retailer.

You can start by visiting www.irobot.com for support tips, frequently asked questions, and information about accessories. This information can also be found in the iRobot HOME App. If you need further assistance, call our Customer Care team at **(877) 855-8593**.

Regulatory Information

Regulatory Model: RMA-Y1

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

- Changes or modifications not expressly approved by iRobot Corporation could void the user's authority to operate the equipment.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules as well as ICES-003 Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio communication will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by taking one or more of the following measures:
 - Reorientate or relocate the receiving antenna.

- Increase the separation between the equipment and the receiver.
- Connect the equipment to an electrical socket on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be chosen so that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.
- FCC Radiation Exposure Statement: This product complies with FCC §2.1093(b) for portable RF exposure limits, set forth for an uncontrolled environment, and is safe for the intended operation as described in this manual.
- ISED Radiation Exposure Statement: This product complies with the Canadian Standard RSS-102 for portable RF exposure limits, set forth for an uncontrolled environment, and is safe for the intended operation as described in this manual.
